Azure API Management

Rabin Kumar mahato

Cloud & Platform Engineer | AWS | Terraform | GenAI Infrastructure | IAM | VPC | Automation & Scalable Systems
Bengaluru, Karnataka, India

Summary

I am a Cloud & Platform Engineer with 3.5+ years of experience working across enterprise cloud environments, infrastructure automation, and emerging GenAI platforms. My experience spans AWS infrastructure provisioning, identity and access governance, secure environment configuration, and supporting AI/GenAI platform workloads at scale. At HP, I contribute to building and maintaining scalable cloud environments used by internal engineering teams. I focus on reliability, automation, and security-first infrastructure design. AWS: EC2, IAM, VPC, S3, Networking Infrastructure provisioning & environment standardization Access governance & security best practices Exposure to GenAI platform infrastructure & cloud resource optimization Automation-first mindset Currently strengthening expertise in Terraform, Kubernetes, and platform engineering principles to design scalable, production-grade cloud systems.

Experience

HP

Cloud Engineer

October 2023 - Present (2 years 10 months)

Bangalore Urban district

- Contributed to deployment and maintenance of 200+ secure AI model endpoints serving internal engineering teams
- Supported a GenAI platform used by 50+ engineers for model experimentation, agent development, and AI service integration
- Managed and operated Kubernetes clusters running 100+ containerized workloads across AI and platform services
- Provisioned and standardized cloud infrastructure using Terraform, improving deployment consistency across environments
- Implemented secure API Gateway integrations, load balancing, and secret management for production AI services

- Contributed to CI/CD pipelines (Jenkins) enabling weekly production deployments for AI workloads
- Automated 20+ recurring operational workflows using Azure Runbooks, Ansible, Python, and PowerShell, reducing manual intervention and operational overhead
- Participated in incident and change management processes, ensuring SLA adherence and production stability
- Contributed to disaster recovery (DR) validation and resilience planning for cloud-hosted services

EIT Services India Pvt. Ltd.

Service Delivery Coordinator

September 2022 - October 2023 (1 year 2 months)

- Supported AWS environments by resolving incidents involving IAM, VPC networking, compute services, and access management within SLA targets.
- Participated in incident management, service restoration, disaster recovery testing, and production support activities.
- Collaborated with L3/L4 engineering teams on cloud operations, troubleshooting, and infrastructure support for enterprise workloads.

Education

CHANDIGARH UNIVERSITY

Master of Computer Applications, Computer Programming, Specific Applications · (January 2023 - January 2025)

GURU NANAK COLLEGE, DHANBAD

Bachelor of Science, Computer Engineering · (September 2019 - September 2022)
